

Exhibit 3

Rasa

0:00

K: Kobe.

0:00

J: Hey, Kobe, this is James Rose.

0:02

J: How are you?

0:03

K: I'm good, James.

0:04

K: How are you doing?

0:05

J: I'm good.

0:07

J: So, you know, Wit. K: Well, I've met him.

0:08

K: I don't-

0:09

K: -I'm not going to say that, but then I've known him for about a week.

0:16

J: Oh, OK.

0:18

K: Yeah.

0:18

J: He said you're you're an engineer and you, you know what you're doing.

0:23

K: That's kind.

0:23

K: I don't think one truly knows what they're doing, no.

0:31

K: It's just a just a never ending, you know, doom loop.

0:37

J: Yeah. K: but I'm figuring it out anyway.

0:39

J: Well, that's good.

0:40

J: Well, that's, that's, it takes a while.

0:42

J: You know, it's, always be learning and it's good to, you know, never think that, you know everything, I guess.

0:48

J: I mean, that's that's a good way to be.

0:51

K: Well, I mean, I, I'm a chemical engineer and I've got 29 years experience in, you know, natural gas, cryogenic natural gas processing right, and liquids.

1:02

K: So the oil sands thing for me is about a six year old effort that, you know, I figured out, you know, we, we got pulled up by a bunch of crooks because everybody in the oil sand game that I've met, you know, are just absolutely crooks, right?

1:22

K: And we just, we got put in a position where we just had to figure it out and, and we were lucky enough to be able to figure it out.

1:31

K: So, but, we're to a point now where we're drilling wells in situ and then we've got a, a patent pending on the [REDACTED] as well.

1:44

J: So K: Which is which is a [REDACTED], which is very, very effective.

1:50

K: So. J: OK. K: What are you doing with the oil sands?

1:54

K: Tell me what you're doing.

1:55

J: Well, I just been approached to, you know, be an investor in some, in this thing that's like a liquid magnet.

2:08

J: And my friend, a friend of mine, you know, he found out about it through a friend of his and, and you know how it all goes, right.

2:20

J: And he's like, listen, this thing's like amazing.

2:23

J: And you know, you know. K: I'll tell you right now.

2:28

K: I think I know what you're talking about.

2:30

K: You're need to be very, very careful.

2:32

K: So do you know the company that owns that technology?

2:37

J: No.

2:37

K: OK.

2:41

K: Yeah.

2:42

K: Because there are a lot of people who say, "Oh, we, we hyper polarize a fluid and it's" but I can tell you right now, if it's what I'm thinking it is, you need to stay way clear of it.

2:53

K: And I can give you, I've written a paper on that actually. A white paper on, on why that's not it's, it's, you can't be done like that.

3:07

K: But I hate to, I hate to say that on the phone without background information.

3:11

J: Well, I mean, it's ah, I think it's a doctor.

3:14

J: David Martin.

3:16

K: Yes, god damn it.

3:18

K: Steer way clear of that.

3:20

K: I, I, I know way too much.

3:22

K: So, we were going to do business with them.

3:24

K: And yeah, this is a long story, but. J: I would, no, I'd love to, I'd love to hear it 'cause I, you know, I've got my friends too, that, you know, we don't want to lose it.

3:36

J: We don't want to get hurt.

3:36

J: We want to make smart decisions.

3:39

K: Yeah.

3:39

K: Let me just, you, you and I need to get to-

3:42

K: Did I- how much - we need to sign an NDA because I don't want to get sued for telling you what I know.

3:48

K: First of all. J: OK. K: But so we, it's a long story.

3:52

K: We did business with them.

3:53

K: They they, there are some of the people that I'm talking about that in my opinion, are not honest brokers.

4:00

K: We owe them money right now that's owed.

4:02

K: It's we're like a pass through, right?

4:04

K: So we owe them and somebody else owes us.

4:05

K: So, they're mad at us.

4:07

K: But let me tell you, I can't tell you over the phone.

4:10

K: What do you think?

4:12

J: OK. K: I don't know.

4:17

K: What are you doing in the morning?

4:18

J: Well, I've got, I've got some things going on with my YPO stuff up in Park City.

4:23

J: I'm a, in part of the Young Presidents Organization.

4:26

J: I'd say I, I have a, a full day tomorrow with my YPO Young Presidents Organization in Park City.

4:33

J: Umm, but, uh. K: What time does that start? J: Well, it's, it's, it's got some, you know, it

4:42

J: I'm not sure exactly what's the time it starts.

4:44

J: It's in the afternoon.

4:45

J: But the other problem is I got, I'm in a huge transaction and I, but I could. K: You cut out again. J:

OK, I said, I said I'm, I'm going to be unavailable tomorrow until probably, I don't know, maybe 1:00, one or two.

5:05

K: You said you live in Park City? J: Yeah, I live in Park City.

5:09

K: Where at in Park City do you live? J: Oh no, no, I don't live in Park City.

5:11

J: I just am renting a house in Park City.

5:13

J: I live in, I live in Puerto Rico, OK? I live in Puerto Rico, but I'm renting a house in, uh, the Canyons.

5:20

K: So, umm, I have to, I have an appointment tomorrow at 1:30 in Woods Cross.

5:29

J: OK, well, what time is that over?

5:36

K: Honestly, I'm taking my kid to see about getting a car, so it'll be two hours.

5:41

J: OK.

5:42

K: What-

5:42

K: What are you doing tomorrow?

5:44

K: Tomorrow afternoon.

5:44

K: Evening.

5:46

J: Yeah.

5:46

J: Let me let me text you in the morning when I think I'm gonna be free 'cause I might be able to do it right before the car or right after.

5:53

K: OK, Umm, I will.

5:59

K: Are you staying in Park City tomorrow night?

6:01

J: Yes, I'm staying in Park City tomorrow night.

6:05

K: OK, so why don't we just meet at the Waldorf afternoon-

6:08

K: Evening.

6:08

J: Yeah, that's right by my house.

6:10

J: The Waldorf is.

6:11

J: I'm staying over there.

6:11

J: The canyons are, you know, the white Pines.

6:14

J: It's kind of like next to the colony.

6:16

J: Right next to the colony is where I'm staying.

6:17

K: OK, so I'm a member of the Waldorf.

6:20

K: Why don't we meet there for drinks tomorrow afternoon at like, say, five?

6:25

J: OK.

6:25

J: And then if for some reason. K: What I'm going to tell you, I'm telling you, James, what I'm going to tell you, you can't share.

6:34

K: I would get they would get they're very litigious.

6:37

K: Like, oh, you you telling people what we're doing?

6:39

K: The fact of the matter is their shit will never work.

6:43

K: So if you give them money, you're just throwing good money away.

6:48

J: OK.

6:49

J: Well, no, I'm looking forward to getting with you.

6:52

J: Let's.

6:53

J: Yeah.

6:53

J: I mean, you know, I mean, yeah.

6:58

J: I mean, listen, I don't want to lose money.

6:59

J: I'd rather do the Q Hydrogen.

7:02

K: Yeah, I'm going to tell you right now.

7:03

K: I'm going to lay it out for you.

7:04

K: You can make your own decision, but I will.

7:07

K: I know this.

7:09

K: I probably know this better than anybody else on the work in the world, and I'm not kidding.

7:16

K: I wrote a patent, like a legal defense against them because I know they'll try to

7:20

K: Oh, you, you're stealing our stuff or whatever.

7:22

K: The fact of the matter is I'm using a [REDACTED] where they're using a so since it's banned in all 48 States and is [REDACTED], you can't do that.

7:38

K: And by the way, if I showed you a Dow Chemical patent from 1984, it's exactly what you're looking at when you look at their little test unit, All right, They're not [REDACTED].

7:49

K: By the way, [REDACTED], they'll tell you, oh, it repels.

7:55

K: Clay finds. Bullshit.

7:58

K: It doesn't repel anything.

8:00

K: There's [REDACTED].

8:03

K: I tested it personally.

8:05

K: I can also show you how [REDACTED].

8:07

K: That's where you take their [REDACTED].

8:11

K: If you put [REDACTED].

8:14

K: It's straight fucking [REDACTED].

8:18

K: Follow me?

8:21

K: OK, you can't [REDACTED] because the compound they're using [REDACTED].

8:31

K: OK, so you can't [REDACTED], right?

8:35

K: You you just make more [REDACTED].

8:36

K: You'd have to [REDACTED].

8:41

K: And furthermore, I control all the fucking oil sands in Utah, pretty much.

8:46

K: So without going through me, good luck with the surface find.

8:49

K: You're not going to find it.

8:51

K: They're they're, they're just, they're full of shit.

8:53

K: And I bought into it for about 6 months to a year and then I took a deep dive for the next year and doing my own research, doing my own patent because their trade secret bullshit won't work.

9:05

K: It's a cult dude around with a bunch of Navy Seals and built Delta Force guys and impress you with the bullshit.

9:12

K: Furthermore, David Martin has a PhD in physical fitness and his other guy, his partner Wisman, I want to see his PhDs.

9:21

K: He claims he has three PhDs from a University of Moscow, Santa Barbara, whatever, bullshit, horseshit.

9:33

J: Wow.

9:33

K: Pardon my language.

9:35

K: But you're talking to a guy who knows everything about that.

9:39

J: All right?

9:40

K: And if you throw money in that, you're going to lose your money.

9:43

K: And I can, I can go through it and tell you why. I can actually fix their shit but I'm not going to it.

9:49

K: They're too stupid to ever figure it out.

9:51

K: They're just lying and people get money, but they're going to fail.

9:55

K: And, and by the way, [REDACTED] does a fantastic job at [REDACTED].

10:02

K: It has nothing to do with [REDACTED].

10:05

K: It's all horseshit in my opinion.

10:10

K: I have to say that just in case you're reporting this phone call and you're a lawyer.

10:13

J: No.

10:15

J: Well, what do you think of the [REDACTED]?

10:20

K: Oh, I love that shit.

10:22

K: That stuff's real.

10:24

J: Yeah.

10:25

K: Alright.

10:25

K: So yeah, I'm, and listen, I'm not an investor.

10:28

K: I'm just the technical due diligence for a group that wants to invest.

10:32

K: And I got another guy who wants to put \$1,000,000 with that group.

10:37

K: So.

10:37

K: But you know, I'll get a little sliver of theirs.

10:40

K: But you know, I'm, I'm, I'm a nobody, just technical guy.

10:43

K: So but I, I know good stuff when I see it and I know bullshit when I see it, particularly with the oil sands stuff.

10:51

K: And tomorrow when we meet, though, I'm going to show you stuff that you can't Unsee.

10:57

J: OK, K: OK, I'm going to show you the patents and I'm going to show you-I can't do this.

11:05

K: I'm going to show you what-they're-I'm going to show.

11:08

K: I'm going to give you that paper that I wrote.

11:11

K: That is why you can't do what they're doing and their claims are just fortunate.

11:16

K: I've tested their product, by the way, [REDACTED].

11:20

K: Their [REDACTED], their product [REDACTED].

11:23

K: What happens with [REDACTED]

11:25

K: Is you, you get a a [REDACTED] where the the you [REDACTED]
[REDACTED].

11:35

K: All right, As a [REDACTED].

11:38

J: OK, K: so does it, does it [REDACTED]?

11:41

K: Absolutely.

11:42

K: Dow Chemical proved that in a patent in 1984.

11:46

K: I'll bring the patent with me.

11:48

J: Huh.

11:48

J: Well, that's good, man.

11:49

K: Show you in that patent.

11:50

K: Then what happened is they stole, they took that patent.

11:54

K: That's why they're not patenting anything.

11:57

K: They're just doing trade secrets.

11:58

K: That's why.

11:59

K: Because they can't patent.

12:00

K: It's an expired patent.

12:02

K: I mean, J: yeah, K: they can claim that they're [REDACTED] and all that shit but you can't use- and I patented the other one.

12:10

K: It's a good luck.

12:11

K: Find me in court.

12:12

K: I'll bury your ass.

12:13

J: Interesting.

12:14

K: I mean, they they don't they don't know they're they claim to be PhD chemist.

12:19

K: They're morons.

12:20

K: They're just con men.

12:22

J: But you do have a way that this could work.

12:25

K: Oh God, yes, I'll, I'll show you our patent too.

12:30

J: OK, cool.

12:30

K: So I'm, I'm actually, we're in terms right now with an investment group out of out of Mexico of all places.

12:38

K: And then we we have another one out of Sweden.

12:41

K: But because there's so many crooks in this game, it's been hard on us to raise well money raisers, right?

12:47

J: Yeah, K: I'm just a dumb old chemical engineer.

12:50

K: But I, I do know oil sand, but I'll go through that with you too.

12:54

K: If you want to meet me at the Waldorf for drinks, dinner or whatever, I'll go through.

12:59

J: OK, great.

12:59

J: I'm looking forward to it.

13:03

J: I'll and I'll touch base with you again in the morning if that's OK.

13:07

K: No, I'm around.

13:08

K: I I've gotta be, I'm building a, a lab unit for the oil sand surface extraction.

13:13

K: But you know what?

13:14

K: If you could, man, if you could break away Saturday and come to my office.

13:18

K: I'll show you the separation on a lab scale.

13:24

J: OK.

13:24

J: I was supposed to go to Bear Lake, but maybe I could do that anyway.

13:28

K: But anytime you can break away like Saturday, Sun and you know, J: Yeah.

13:34

J: OK.

13:35

J: OK. Yeah.

13:36

K: I'll show it to you with our solvent.

13:41

K: Our solvent is also a minimum bullet point Asian trope just like theirs.

13:44

K: But ours is not [REDACTED].

13:45

K: Another thing that the problem with theirs, [REDACTED].

13:49

K: OK, their [REDACTED].

13:53

K: So let me ask you this.

13:54

K: If you're going to use a [REDACTED], by the way, they're, they're a big unit.

14:00

K: They're claiming - they're stealing a bunch of my ideas.

14:03

K: By the way, they would never have known this without me telling them, right?

14:09

K: But again, I was working with them.

14:10

K: I bought into their stuff for a while, and then I started looking behind the curtains and it's just all bullshit.

14:15

K: I noticed that the [REDACTED].

14:17

K: I noticed that the Bs and [REDACTED].

14:21

K: You know, I know that it's banned in 48.

14:26

K: You know, actually all 50 states, the EPA banned that substance.

14:31

K: And I also know that the [REDACTED] is, [REDACTED]
[REDACTED]
[REDACTED]

14:43

K: But let me ask you this, in the [REDACTED]
[REDACTED], how the hell if it if the [REDACTED], how the hell is that w [REDACTED]
[REDACTED]?

14:56

K: It's not. J: OK.

14:57

K: It's going to switch places.

15:00

K: You see what I mean?

15:00

K: So you - they have a, they just don't they don't know what they don't know.

15:04

J: Yeah, K: funny to me that they are way better at ____ than I am.

15:10

J: OK. K: Way better.

15:10

K: But they'll just spend your money and it's just you're just throwing good money after bad.

15:14

K: I just cannot in good conscious not to tell you.

15:18

J: Well, look, man, I'm I'm it's, this is why K: I've got not even asking.

15:22

J: That's why you gotta have friends, you know, and do do the due diligence and ask around.

15:29

J: You know? K: I mean, I'm telling you, once you see what I'm doing, I'm not even asking you for an investment.

15:33

J: Well, I'm looking forward to meeting you.

15:34

J: Sounds like you're into some really interesting stuff and I'm looking to diversify my family office.

15:39

K: Well, I'm, I'm telling you right now, I'm not even if you wanted to invest, I'm open to it.

15:45

K: At least you know it's real 'cause I'll do it in front of you and be like here it is and I'll, I'll tell you everything.

15:52

J: Yeah.

15:52

J: And I've got a brother-in-law.

15:53

K: Nobody's. J: I got a brother-in-law who's a good friend of mine actually, and he used to work in the oil fields.

16:00

J: He used to have some some gas fields in Wyoming and he had a CO2.

16:05

J: He owned the Dome that's West of the Mississippi here by Price, UT and he sold that.

16:10

J: And he's a, he's the guy that I kind of, he's not an engineer though or anything, you know, but he used to work well heads, right?

16:18

J: And he he used to do stuff up in Williston, Montana and and all of that.

16:23

J: And so, but we need a guy that understands the other side of this because I'm wanting to get into this, some of the investment into this stuff.

16:29

J: And, and so I'm looking forward to meeting you.

16:32

J: But listen, I got to take this call.

16:33

J: It's my wife and, and yeah, I'll call you in the morning.

16:38

J: OK, thanks.

16:39

J: Bye Kobe.
